

TASK 1 / PRODUCT MANAGEMENT

USER PERSONA & EMPATHY MAP

Who is the user, what do they need, and what is their real pain point?

PARKEASY

Smart Parking Finder & Reservation App

A visual case study • Beginner-friendly • Ready for submission

The person behind the problem

Before building ParkEasy, we need to understand the person who experiences the parking problem.

RAHUL SHARMA

24 years • Software Engineer • Hyderabad

PRIMARY NEED

Find reliable parking quickly without wasting time driving around.

Persona Snapshot

Attribute	Rahul
Transportation	Personal car
Parking frequency	5–6 days/week
Technology	Smartphone, maps, digital payments
Goal	Reach destination on time
Frustration	Parking may be full when he arrives

Empathy Map

SAYS

"I have been searching for parking for 15 minutes."
"I don't want to be late."

THINKS

"Will I find a space?"
"How much will it cost?"
"Can I reserve it?"

DOES

Drives around • checks maps • asks local people • visits multiple parking locations

FEELS

Frustrated • stressed • worried about being late • impatient

Key Insight

Parking availability is the uncertainty. If users can see trustworthy availability before they arrive, the stressful search becomes a predictable journey.

Product Opportunity

Design the first experience around **discover** → **verify availability** → **reserve** → **navigate**.
